# Safe Crossing over I-5

*I prioritize the movement of people, not just cars on this bridge between two communities.*

100

## HOW DO YOU GET ACROSS I-5 SAFELY?

The 45th St bridge over I-5 is the only option for walking and biking between the Wallingford & U District urban areas, the light rail station, or north UW Campus. Let's make the crossing safer for everyone while adding an uphill bike lane. This project has:

- *Been promised to voters in the 2015 Move Seattle Levy and funded by Seattle City Council*
- *Support of the Wallingford and U District community organizations*
- *600+ signatures and personal testimonials in support*
- *An extensively researched solution that does not impact throughput of vehicles or transit*
- *Connections to greenways on 43rd and 47th once across the bridge*
- *New safety fencing has been approved and is pending construction*
