Green Street on 42nd

I see NE 42nd Street as a key part of the U District's open space network.

100

WHAT IS A 'GREEN STREET'?

Green Streets emphasize pedestrian movement, landscaping, outdoor seating, traffic calming, and other unique features that make it an attractive environment for all users, regardless of mode of transport. Some benefits include:

- *Safer street that is accessible to all modes, ages, and abilities*
- *Native, non-invasive vegetation and mature tree canopy*
- *Curbless street design and pervious sidewalk pavers*
- *Pedestrian seating areas, planters, and wayfinding signage*
- *Loading & delivery parking prioritized for local businesses*
- *Easy temporary closure to traffic for events like farmers markets*
- *Green Streets also help address climate change by reducing heat islands and encouraging active mobility.*
